Introduction

InDesign is a page design and layout tool by Adobe. This booklet is designed to introduce you to the essential skills you will need to get started using some of the basic InDesign tools. These instructions were created using InDesign CC 2014 for Windows; the Mac OS X version is similar.

Learning Objectives

After completing the instructions in this booklet, you will be able to:

- Create a new publication
- Understand the InDesign layout
- Create master pages and pages
- Place and edit text boxes, pictures, and shapes
- Apply colors and create swatches
- Review the publication for errors
- Save files in different version or formats
- Print a document

Exploring the Workspace

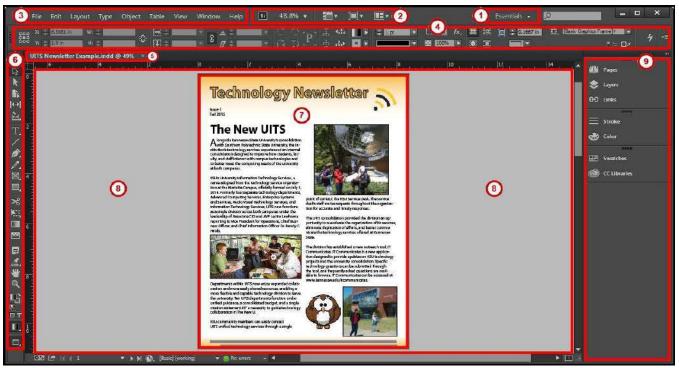

Figure 1 - Adobe InDesign Workspace.

- 1. **Workspace switcher** A workspace is the selection of InDesign tools laid out on your screen for easy access (See Figure 1). The default workspace is *Essentials*.
- 2. Application Bar Has menus for zooming and other application controls (See Figure 1).
- 3. **Menu Bar** File, Edit, etc. InDesign functions are available from the drop-down menus (See Figure 1).
- 4. **Control Panel** Displays options relevant to the currently selected tool (See Figure 1).
- 5. **Tabbed Document windows** You will have a tab for each file you have open (See Figure 1).
- 6. Tools Panel Tools used to create text, objects, and images (See Figure 1).
- 7. **Document** Allows you to create and edit text, objects, and images in this area, to be printed (See Figure 1).
- 8. **Paste Board** Objects and images can be created in the scratch area, but will not be printed (See Figure 1).
- 9. **Panels** Panels hold multiple options used for editing and manipulating objects (See Figure 1). To display more panels, go to *Window* on the *menu bar*.

Setting up Documents

This section will explain how to create a new document, change the document setup after a document has been created, and change what measurements to display when working in a document.

Create a New Document

Follow these instructions to create a new file.

- 1. Click the File menu.
- 2. Click **New > Document**. The *New Document* dialog window will appear.
- 3. Choose the Intent of the document from the Intent drop-down (See Figure 2).
- 4. Enter the **Number of Pages** that you would like to have in the document (See Figure 2).
- 5. Select **Facing Pages** ONLY if you want left and right pages to face each other like a book or magazine (See Figure 2).
- 6. Select the Paper Size and Orientation (See Figure 2).

Note: Picas is the default measurement when creating a new document. Go to Change the Measurement Display to see how to change this.

- 7. Columns will create guides to help place your objects in a column format (See Figure 2).
- 8. **Margins** will create guides to help place your objects so you don't work outside your printing boundaries (See Figure 2).
- 9. Select **Preview** to see how your new document will look before creating it (See Figure 2).
- 10. Click the **OK** button (See Figure 2).

New Document

Preview 9 OK Cancel

Figure 2 - New Document Dialog Window.

Change the Document Setup

Follow these steps if you need to change the document setup when you first created your document.

- 1. Click the File menu.
- 2. Click **Document Setup**. The *Document Setup* dialog window will appear.

Note: The margins and columns configuration are found in the **Layout > Margins and Columns** menu.

Change the Measurement Display

Picas is the default measurement when creating a new document. Follow these steps to change to change the default measurement of the document.

- 1. Click the Edit menu.
- 2. Click **Preferences > Unit & Increments**. The *Preferences* dialog window will appear.
- 3. Under *Ruler Units*, change the **Horizontal** and/or **Vertical** measurement (See Figure 3).
- 4. Click the **OK** button (See Figure 3).

Master and Regular Pages

Master pages are used to build a template for your document. Pages are used to link your master pages and to add your regular content.

Pages Panel

You can easily create and manage master and regular pages through the *Pages* panel. Follow these instructions to open the Pages panel.

- 1. Click the **Window** menu.
- 2. Click Pages.
- 3. The **Pages** panel will open on the *Panels* toolbar (See Figure 4).

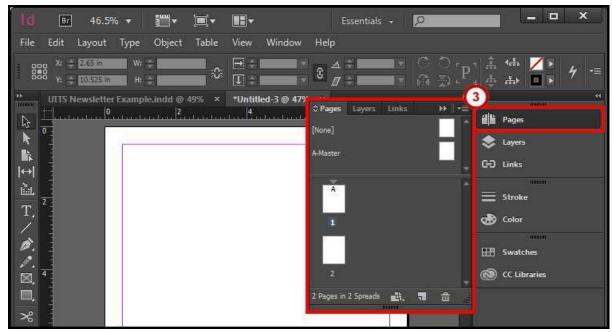

Figure 4 - Pages Panel.

Create a Master Page

- 1. Open the **Pages** panel from the *Panels* toolbar (See Figure 5). The *Pages* panel will appear.
- 2. Click on the Pages panel options menu (See Figure 5).

Figure 7 - New Master Dialog Window.

Note: Master pages are noted by a prefix (e.g. A-Master, B-Master, etc.). These prefixes help identify which master page is linked to a page. Go to Apply a Master Page to see how to set this up.

Edit a Master Page

- 1. Open the **Pages** panel from the *Panels* toolbar (See Figure 8). The *Pages* panel will appear.
- 2. Double Click the master page icon to open the page for editing (See Figure 8).

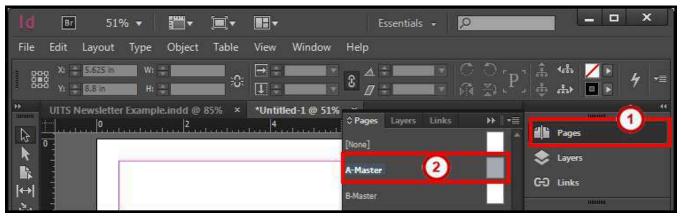

Figure 8 - Edit Master Page.

Note: You can also select the master page for the dropdown at the bottom of the document window (See Figure 9).

Apply a Master Page

- 1. Open the **Pages** panel from the *Panels* toolbar (See Figure 10). The *Pages* panel will appear.
- 2. Left Click on a page icon (See Figure 10).
- 3. Click on the Pages panel options menu (See Figure 10).

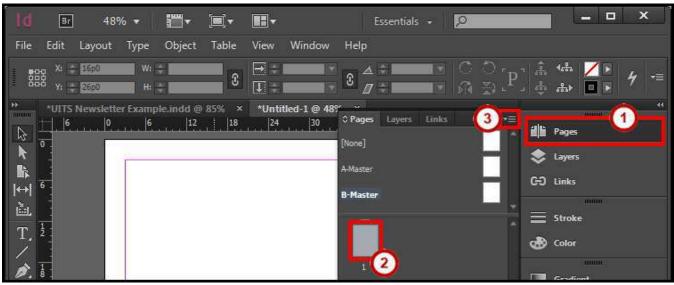

Figure 10 - Select a Page.

4. Click Apply Master to Pages (See Figure 11). An Apply Master dialog window will appear.

Text

Text reside in objects called *Text Frames*. Using the *Type Tool*, you can edit the characters individually or an entire paragraph. You can also use *Story Editor* to easily type or edit the text all in this window.

Create a Text Frame

1. From the *Tools Panel*, click the **Type Tool** (See Figure 17)

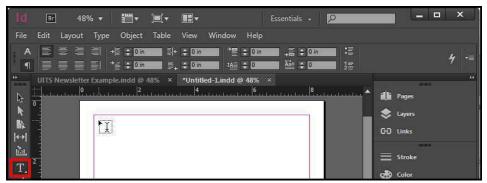

Figure 17 - Type Tool.

2. Left click and hold anywhere on the document, then draw your Text Frame (See Figure 18).

Placing Text from another Document

If you already have text in a document or spreadsheet, you can easily import it into InDesign. You can import Microsoft Word Documents, .rtf files, text files, and Microsoft Excel spreadsheets.

Note: If you have a frame selected, this action will replace the contents in that frame or if you have the insertion point in the text frame this action will add the text to that frame.

- 1. Click the File menu.
- 2. Click Place.
- 3. In the *Place* window, find and select your document and click the **Open** button (See Figure 24).

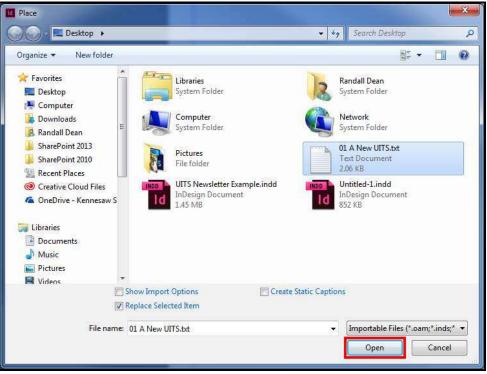

Figure 24 - Find and Place Document.

4. The pointer shows the text from the document you opened ready to be placed (See Figure 25).

Formatting the Paragraph

To format the paragraph for your text you just need your insertion pointer selecting the paragraph or placed in the paragraph text. Then you can use the paragraph formatting from the *Control panel* to change the formatting.

Changing the Alignment

- 1. From the *Tools Panel*, click the **Type Tool** (See Figure 40).
- 2. On the document, left click the Text Frame. (See Figure 40).

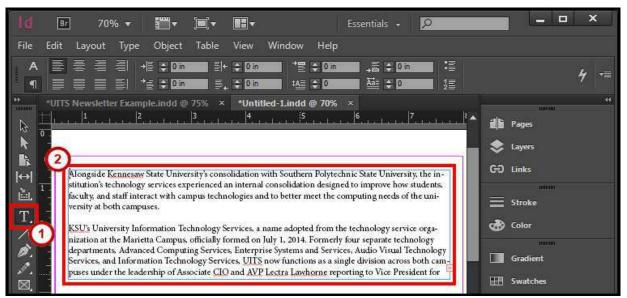

Figure 40 - Select Text Frame with Type Tool.

- 3. In the text frame, left click and hold, then select the text (See Figure 41).
- 4. After you have the text selected in the *Text Frame*, let go of the Left Click (See Figure 41).

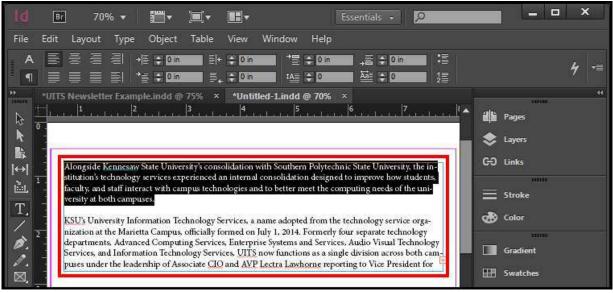

Figure 41 - Highlight Text.

- 5. From the *Control Panel*, click the **Paragraph Formatting Control icon** (See Figure 42).
- 6. Select the desired **Alignment** from the list (See Figure 42).

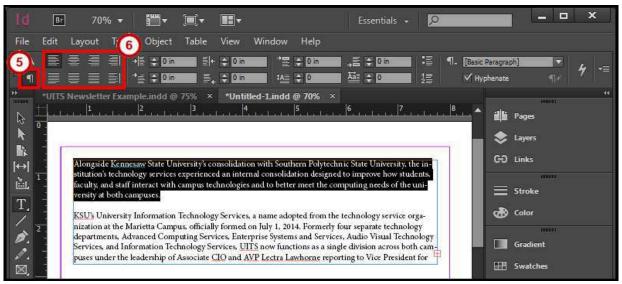

Figure 42 - Justification.

Inserting a Drop Cap

- 1. From the Tools Panel, click the Type Tool (See Figure 43).
- 2. On the document, left click the Text Frame. (See Figure 43).

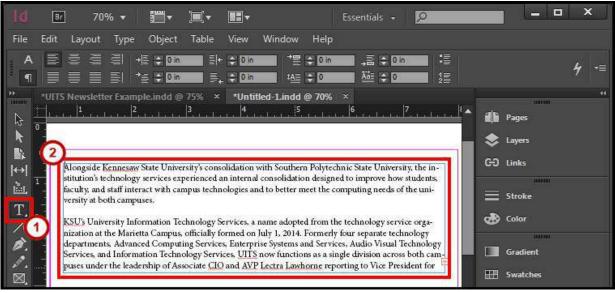

Figure 43 - Select Text Frame with Type Tool.

- 3. In the text frame, left click and hold, then select the text (See Figure 44).
- 4. After you have the text selected in the *Text Frame*, let go of the Left Click (See Figure 44).

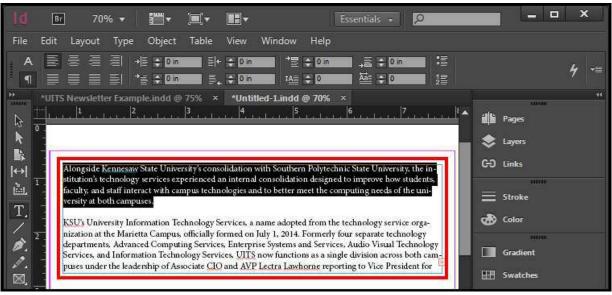

Figure 44 - Highlight Text.

- 5. From the *Control Panel*, click the **Paragraph Formatting Control icon** (See Figure 45).
- 6. Increase or decrease the **Drop Cap Number of Lines** (See Figure 45).

Figure 45 - Drop Cap Number of Lines.

Hyphenate

This option turns on or off *Hyphenation* for the entire paragraph so no words split across lines.

- 1. From the *Tools Panel*, click the **Type Tool** (See Figure 46).
- 2. On the document, **left click** the *Text Frame*. (See Figure 46).

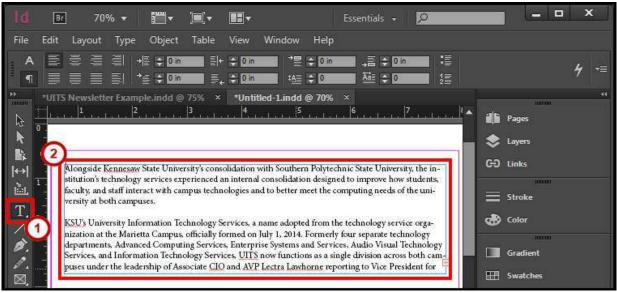

Figure 46 - Select Text Frame with Type Tool.

- 3. In the text frame, left click and hold, then select the text (See Figure 47).
- 4. After you have the text selected in the *Text Frame*, let go of the **Left Click** (See Figure 47).

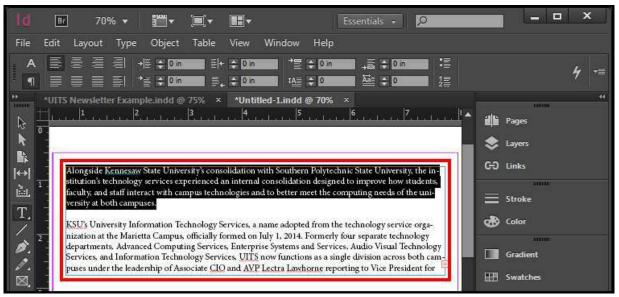

Figure 47 - Highlight Text.

- 5. From the *Control Panel*, click the **Paragraph Formatting Control icon** (See Figure 48).
- 6. Check or un-check Hyphenate (See Figure 48).

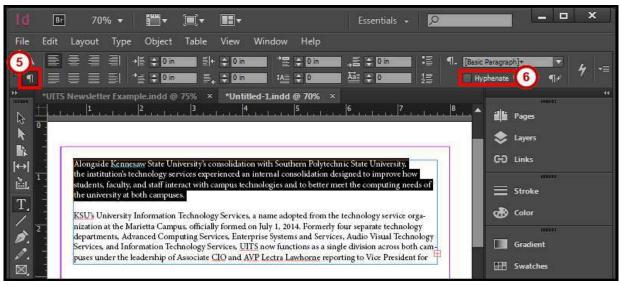

Figure 48 - Hyphenate.

No Break

Use *No Break* if you don't want a word or sentence to be separated by lines.

- 1. From the Tools Panel, click the Type Tool (See Figure 49).
- 2. On the document, left click the *Text Frame*. (See Figure 49).

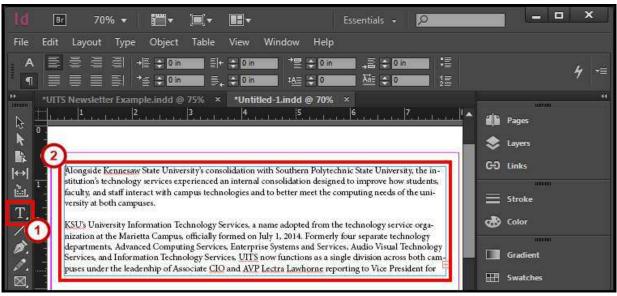

Figure 49 - Select Text Frame with Type Tool.

- 3. In the text frame **left click and hold**, then **select** the text (See Figure 50).
- 4. After you have the text selected in the *Text Frame*, let go of the Left Click (See Figure 50).

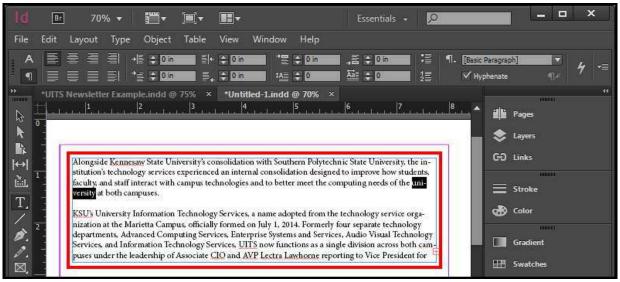

Figure 50 - Highlight Text.

5. From the *Control Panel*, click the **Control panel menu** (See Figure 51).

Figure 51 - Control Panel Menu.

6. Click No Break (See Figure 52).

Figure 52 - No Break.

Insert Page Numbering

- 1. From the *Tools Panel*, click the **Type Tool** (See Figure 53).
- 2. On the document, **left click** the *Text Frame*. (See Figure 53).
- 3. Type the word **Page** (See Figure 53).

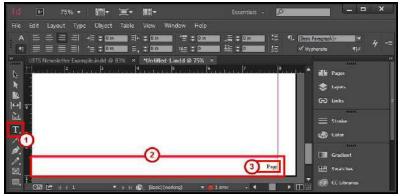

Figure 53 - Create Text Frame for Page Footer.

- 4. Click the **Type** menu.
- 5. Click Insert Special Character (See Figure 54).
- 6. Click Markers (See Figure 54).
- 7. Select the desired Page Number from the list (See Figure 54)

Insert Special Character	(5)	Symbols	F	
Insert White Space	+	Markers 6	÷	Current Page Number Ctrl+Alt+Shift+N
Insert Break Character	+	Hyphens and Dashes	÷	Next Page Number
Fill with Placeholder Text		Quotation Marks	×	Previous Page Number

Figure 54 - Insert Page Number.

Story Editor

This story editor window will let you to write the entire text in a text frame, apply formatting, discover if text is overset, and show spelling errors.

- 1. From the *Tools Panel*, click the **Type Tool** (See Figure 55).
- 2. On the document, left click the Text Frame. (See Figure 55).

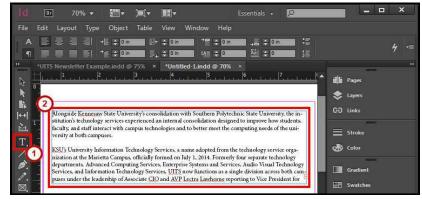

Figure 55 - Select Text Frame with Type Tool.

- 3. Click the Edit menu.
- 4. Click Edit in Story Editor.
- 5. From the *Story Editor* dialog window, you have the following options:
 - a. **Type Text** Type or edit the text (See Figure 56)
 - b. **Formatting** Apply formatting by Formatting the Text or Formatting the Paragraph.
 - c. **Overset** If you see *Overset* it means your text is not visible on your document. Go to Resizing the Text Frame or Text Threading to fix this (See Figure 56).
 - d. **Spelling Errors** Shows misspelled words with a red underline. Go to Spell Checker (See Figure 56)
- 6. Close the Story Editor dialog window when done (See Figure 56).

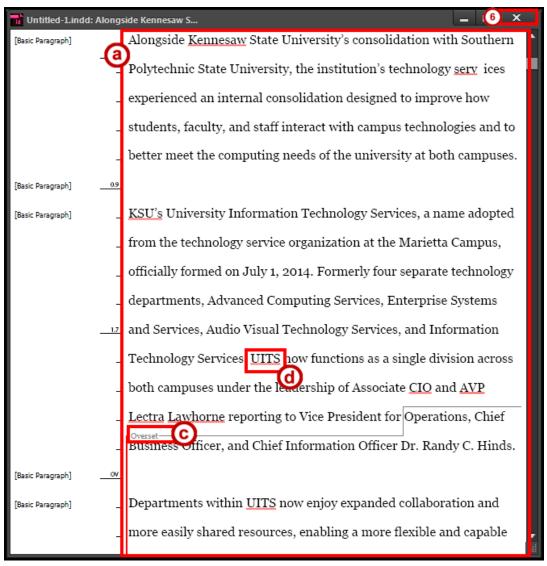

Figure 56 - Story Editor.

Placing Images and Shapes

You can place images anywhere in the publication. Images can be resized and have text wrapping around them. Creating shapes and adding color help to apply a design to the publication.

Place Images

- 1. Click the File menu.
- 2. Click Place.
- 3. In the *Place* window find and select your image, click the **Open** button (See Figure 57).

5. **Left click** on the publication to place the image.

Resize the Image Frame

The image frame is the place holder for the image on the publication.

- 1. From the *Tools Panel*, click the **Selection Tool** (See Figure 59).
- 2. On the document, left click the Image (See Figure 59).

Note: The image frame is selected when the frame is *blue*.

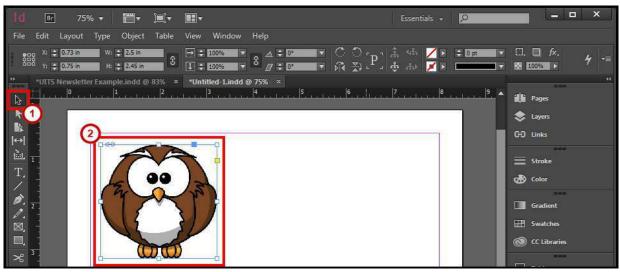

Figure 59 - Select Image.

- 3. There are two methods to change the size of the *Image Frame*.
 - a. Left click and hold the sizing handles, then drag inward or outward (See Figure 60).
 - b. From the *Control Bar*, change the **Width** and/or **Height** (See Figure 60).

Figure 60 - Resize Image Frame.

Resize the Image

The image can be manipulated inside the image frame.

- 1. From the *Tools Panel*, click the **Selection Tool** (See Figure 61).
- 2. On the document, left click the Image (See Figure 61).

Note: The image frame is selected when the frame is *blue*.

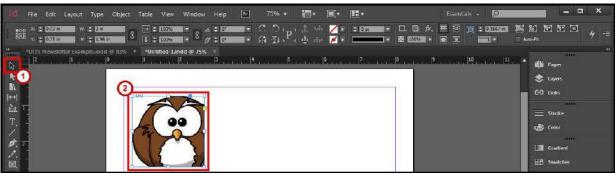

Figure 61 - Select Image.

3. Place your cursor over the center of the selected image, then left click the circle (See Figure 62).

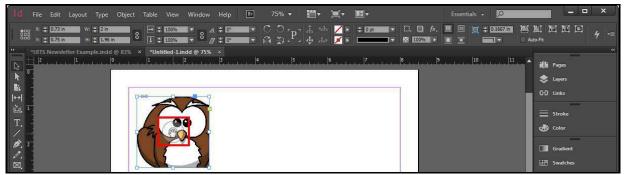

Figure 62 - Place Cursor Over Selected Image.

4. The frame will change from *blue* to *orange*. This will allow you to manipulate the image (See Figure 63).

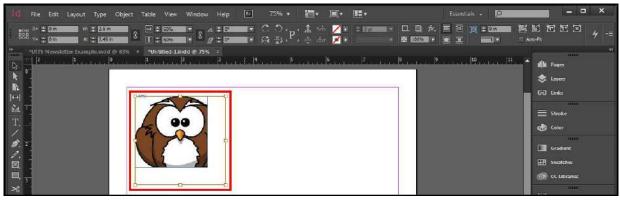

Figure 63 - Manipulate Image.

- 5. There are two ways you can change the size of the *Image*.
 - c. Left click and hold the sizing handles, then drag inward or outward (See Figure 64).
 - d. From the *Control Bar*, change the **Fitting** (See Figure 64).

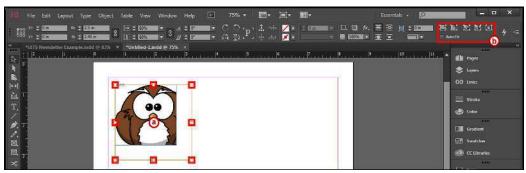

Figure 64 - Resize Image.

Text Wrap

- 1. From the *Tools Panel*, click the **Selection Tool** (See Figure 65).
- 2. On the document, **left click** the *Image* (See Figure 65).

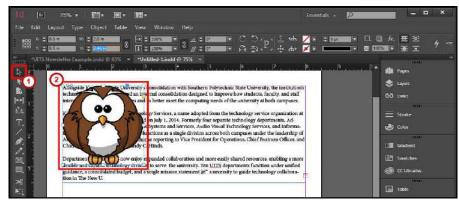

Figure 65 - Select Image.

- 3. Click the **Window** menu.
- 4. Click Text Wrap.
- 5. In the *Text Wrap* popup window, **select** your desired text wrap and settings (See Figure 66).

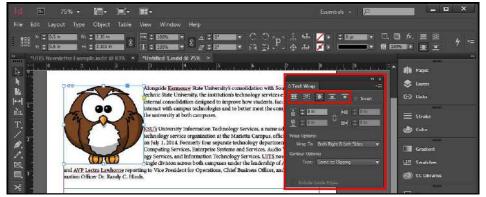

Figure 66 - Text Wrap.

Inserting Shapes

- 1. From the *Tools Panel*, right click the **Shape Tool** (See Figure 67).
- 2. **Select** your desired *Shape* (See Figure 67).

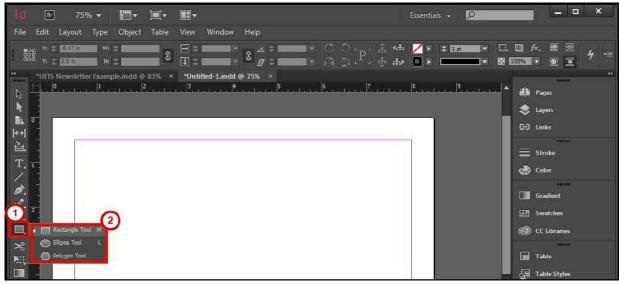

Figure 67 - Select Shape.

3. On the document, left click and hold, then draw your Shape (See Figure 68).

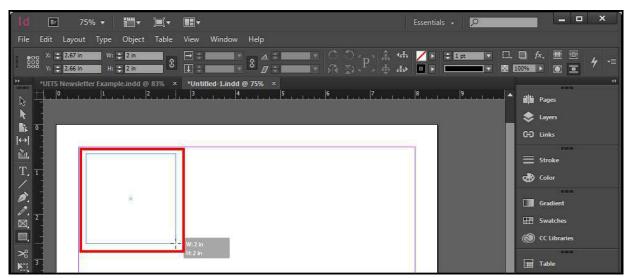

Figure 68 - Draw Shape.

4. After you have created the desired size of the *Shape*, let go of the **Left Click**. Your shape is drawn and you can now apply a color. See Swatches, Gradient Swatches, and Color to learn how to apply a color.

Swatches, Gradient Swatches, and Color

There are many ways to apply color to your publication. Swatches and gradient swatches allow you to apply colors quickly to your text or objects. If you change the swatch color, objects connected to it on your publication will change. You can apply a color to the line stroke or fill of the object.

Create a Swatch

- 1. Click the Window menu.
- 2. Click Color > Swatches.
- 3. In the *Swatches* popup window, click on the **Swatches panel options menu** (See Figure 69).

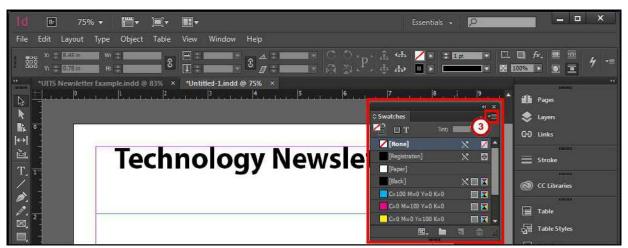

Figure 69 - Swatches Panel Options Menu.

4. Click **New Color Swatch** (See Figure 70). A *New Color Swatch* dialog window will appear.

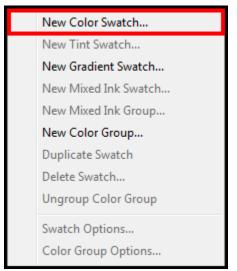

Figure 70 - New Color Swatch.

- 5. From the *New Color Swatch* dialog window, set the following options:
 - a. **Name** Keep the color value name or apply your own name (See Figure 71).
 - b. **Color Mode** Mode used for defining your color (See Figure 71).
 - c. **Color Sliders** Change the color sliders for your desired color (See Figure 71).
- 6. Click the **OK** button (See Figure 71).

Color Mode: CMYK	 ♥ 0 % 100 % 9 % 	Add

Figure 71 - New Color Swatch Dialog Window.

Create a Gradient Swatch

- 1. Click the Window menu.
- 2. Click Color > Swatches.
- 3. In the *Swatches* popup window, click on the **Swatches panel options menu** (See Figure 72).

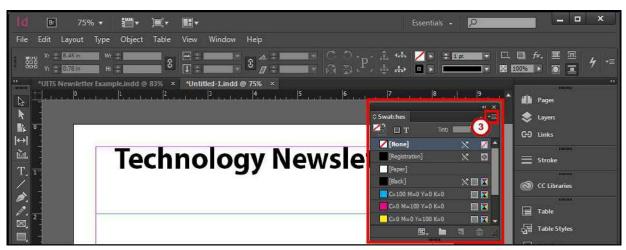

Figure 72 - Swatches Panel Options Menu.

4. Click **New Gradient Swatch** (See Figure 73). A *New Gradient Swatch* dialog window will appear.

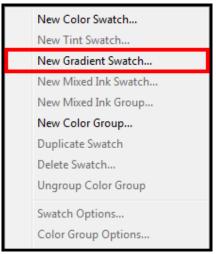

Figure 73 - New Gradient Swatch.

- 5. From the *New Gradient Swatch* dialog window, set the following options:
 - 1. Swatch Name Create a name for the gradient (See Figure 74).
 - 2. **Type** Choose *Linear* or *Radial* for desired display (See Figure 74).
 - 3. **Color Stop** Color stops hold the desired color (See Figure 74).
 - 4. **Stop Color** Mode used for defining your color (See Figure 74).
 - 5. Color Sliders Change the color sliders for your desired color (See Figure 74).
 - 6. **Midpoint** Move the midpoint to increase or decrease the amount of color for both color stops (See Figure 74).
- 6. Click the **OK** button (See Figure 74).

Review Publication

Be sure to use the spell checker tool and preflight panel to check for any errors on your publication.

Spell Checker

- 1. Click the **Edit** menu.
- 2. Click **Spelling > Check Spelling**.
- 3. From the *Check Spelling* dialog window, use following options.
 - a. **Skip** Continue spell checking without changing the highlighted word (See Figure 83).
 - b. Change Change this word (See Figure 83).
 - c. Ignore All Ignore all occurrences of this word (See Figure 83).
 - d. Change All Change all occurrences of this word (See Figure 83).
 - e. Add Add a word to your InDesign dictionary (See Figure 83).
- 4. Click the **Done** button (See Figure 83).

Save, Export, and Print Publication

You can save as InDesign or export to a different file format. You also have multiple ways of printing your publication.

Saving as InDesign

- 1. Click the File menu.
- 2. Click Save.
- 3. In the *Save As* window, find and select your location to save your publication and type a **File Name** (See Figure 85).
- 4. Click the **Save** button (See Figure 85).

Figure 85 - Save InDesign Document.

Export

- 1. Click the File menu.
- 2. Click Export.
- 3. In the *Export* window, find and select your location to save your publication and type a **File Name** (See Figure 86).
- 4. Choose Save as type to save as a different file type (See Figure 86).
- 5. Click the **Save** button (See Figure 86).

Figure 86 - Export.

Printing

- 1. Click the File menu.
- 2. Click **Print**. The *Print* dialog window will open.
- 3. Choose the **Printer** you want to print to (See Figure 87).
- 4. Choose from the **options** available (See Figure 87).
- 5. Click the **Print** button (See Figure 87)
